PROJECTS

Warehouse Management System

A Warehouse Management System (WMS) is a software system for efficient warehouse management. I worked on this project with a dedicated team of three, contributing to the optimization of goods storage, movement, and tracking in warehouses.

Tech: React, Firebase

O'Click-Nic

O'Click-nic," short for "Online Clickable Clinic," is a groundbreaking virtual healthcare platform developed by our team of three. This innovative application offers accessible medical check-ups, connecting patients with healthcare professionals from home. Doctors can efficiently monitor patients' health and provide valuable treatment recommendations, ensuring timely care.

Pizza Service

A "web pizza service" is a collaborative effort between two individuals. It's an online platform that allows customers to easily order pizza from home. They can also track their orders, while helping restaurants efficiently manage them..
